

GAURAV SINGH BHIDWAL

NOIDA, INDIA | 9971528971 | gaurav.bhidwal@gmail.com

Senior **Java Backend Developer** with **5+ years** of experience in designing and developing scalable enterprise applications in the BFSI domain using **Java 8/11, Spring Boot, Spring MVC, and Microservices architecture**. Strong experience in building secure **REST APIs**, distributed systems, and backend modules for Loan Management System (LMS) and Loan Origination System (LOS), covering customer onboarding, loan disbursement, repayment processing, EMI tracking, validation workflows, and approval management. Hands-on expertise in **MySQL, Oracle, PL/SQL, JPA/Hibernate, Redis, Kafka, Maven, Git** and **Swagger/OpenAPI**. Experienced in **API integration** with third-party vendors including payment gateways, bureau and verification systems. Proficient in leveraging AI-assisted development too such as GitHub Copilot and Cursor AI for code generation, debugging, refactoring, documentation, and productivity enhancement. Skilled in **SQL** query optimization, caching, **CI/CD pipelines**, production support, code reviews, debugging, **Agile/Scrum**, and building high-performance backend systems with scalability, reliability, and security.

Experience

- ❖ **SENIOR SOFTWARE ENGINEER** | AURIONPRO SOLUTIONS | NOV 2023 – PRESENT
- ❖ **SOFTWARE ENGINEER** | A S SOFTWARE SERVICES | OCT 2021 – OCT 2023
- ❖ **JAVA DEVELOPER** | SQUAD IFOTECH PVT LTD. | AUG 2019 – JAN 2020

Skills & Expertise

- | | | |
|-------------------|-------------------------|-----------------------|
| ❖ Java 8/11/17 | ❖ Optimization | ❖ Performance |
| ❖ Core Java | ❖ Redis Cache | ❖ Optimization |
| ❖ Spring Boot | ❖ Apache Kafka | ❖ Database Design & |
| ❖ Spring MVC | ❖ Distributed Systems | ❖ Data Modeling |
| ❖ Microservices | ❖ Jenkins (CI/CD) | ❖ Agile / Scrum |
| ❖ Architecture | ❖ Maven | ❖ Code Review & Clean |
| ❖ RESTful APIs | ❖ Git / GitHub / GitLab | ❖ Code / SOLID |
| ❖ Spring Security | ❖ Swagger / OpenAPI | ❖ AWS Cloud (EC2 / S3 |
| ❖ Hibernate / JPA | ❖ API Integration | ❖ basic) |
| ❖ MySQL | ❖ JWT Authentication / | ❖ Data Structure & |
| ❖ Oracle SQL | ❖ OAuth2 | ❖ Algorithms |
| ❖ PL/SQL | ❖ Production Support & | |
| ❖ SQL Query | ❖ Debugging | |

Projects

Loan Management System (LMS) – End-to-End Loan Disbursement Platform

Worked on an enterprise Loan Management System (LMS) used to manage the complete post-sanction loan lifecycle including loan account creation, disbursement, repayment schedule generation, EMI tracking, payment processing, interest calculation, customer servicing, and loan closure. Developed scalable backend services using **Java 8/11, Spring Boot, and Microservices architecture** with secure **REST APIs** for seamless communication across internal services and external systems. Integrated with **LOS, payment gateways, credit bureaus, e-sign vendors, and accounting platforms**. Improved application performance using **Redis caching, SQL query optimization, PL/SQL procedures, and Kafka-based event-driven processing**. Managed large transaction data in

MySQL and Oracle, created APIs using **Swagger/OpenAPI**, and supported deployment through **Maven, Jenkins, Docker, and Git**.

Tech Stack: - Java 8/11, Spring Boot, Microservices, REST APIs, MySQL, Oracle, PL/SQL, Redis, Kafka, Maven, Jenkins, Docker, Git, Swagger/OpenAPI.

Loan Origination System (LOS) – Customer Onboarding & Approval Platform

Worked on Loan Origination System (LOS) responsible for managing the complete customer onboarding and loan approval process before disbursement. Developed backend modules for **customer application onboarding, KYC validation, document verification, bureau checks, eligibility calculation, approval workflows, sanction generation, and customer verification** using **Java, Spring MVC, and Spring Boot**. Built secure **REST APIs** and integrated with third-party verification vendors to automate approval workflows and reduce manual effort.

Implemented business validation logic and database operations using **MySQL and PL/SQL**. Optimized backend services and SQL queries for faster processing and improved reliability. Managed build and deployment activities using **Maven, Jenkins, and Git**, handled production issues, bug fixes, code reviews, and collaborated with Agile teams.

Tech Stack: Java, Spring Boot, Spring MVC, REST APIs, MySQL, Oracle, PL/SQL, Maven, Jenkins, Git, API Integration, Agile/Scrum.

Roles & Responsibilities

- ❖ **Designed and developed scalable backend applications using Java 8/11, Core Java, Spring Boot, and Spring MVC** for enterprise financial platforms, ensuring high performance, clean architecture, and maintainable code.
- ❖ **Built and maintained Microservices-based architecture** for Loan Management System (LMS) and Loan Origination System (LOS), enabling secure communication between distributed services through RESTful APIs.
- ❖ **Developed REST APIs and integrated third-party services** including payment gateways, credit bureaus, KYC/document verification vendors, e-sign platforms, and internal financial systems for seamless workflow automation.
- ❖ **Implemented business modules for customer onboarding, loan disbursement, EMI schedule generation, repayment tracking, eligibility validation, approval workflow, and loan closure** based on business requirements.
- ❖ **Designed and optimized database solutions using MySQL, Oracle SQL, and PL/SQL**, including stored procedures, query tuning, indexing, and transaction handling for large-scale financial data.
- ❖ **Improved application performance using Redis caching and Kafka-based asynchronous event-driven architecture**, increasing transaction throughput and reducing API response time.
- ❖ **Managed build and release activities using Maven, Git, Jenkins, and Docker**, and supported CI/CD pipeline execution for automated build, deployment, and environment releases.
- ❖ **Created and maintained API documentation using Swagger/OpenAPI**, validated endpoints using Postman, and ensured secure API communication with proper request/response handling.
- ❖ **Provided production support, issue analysis, debugging, and defect resolution**, ensuring application stability, faster RCA, and smooth releases across development and production environments.
- ❖ **Participated in Agile/Scrum ceremonies including sprint planning, requirement analysis, estimation, code reviews, and cross-team collaboration** with QA, business, and product teams.
- ❖ Followed best coding practices including **OOP, SOLID principles**, exception handling, reusable components, **performance optimization**, and secure **backend development** for scalable applications.

Education

- ❖ **MCA | IGNOU | 2023-2025**
